REFERENCE INDEX

Volume 51 1932

Published by the American
Institute of Electrical Engineers

Annual Reference Index

To provide a comprehensive reference guide covering the contents of 12 issues of ELECTRICAL ENGINEERING for 1932, the style that proved popular in the 1931 Reference Index is repeated, this year in a different color so that it may readily be distinguishable. Material covered is presented in 5 major divisions, each arranged in alphabetical order and each item generously cross-referenced. Divisions include:

1. Technical subject index embracing all non-departmental material published during 1932.

2. Index of authors and contributors including a listing of all signed articles.

3. Index of all news items pertaining to Institute activities.

4. Index of general—Non-Institute—news items.

5. A biographical division containing the names and page references for all persons whose activities were recorded either in the "personal" or "obituary" departments; including also all other entries of a personal rather than of a general nature.

Division I—
Technical Subject Index

Aging and Elastic Hysteresis in Instrument Springs. Carson, MacGahan. (Abs.) 130
Absolute Electrical Unit System, A Proposal to Abolish the. Weber. (Abs.) 264
A-C Electrified Railroads, Supervisory Control for. West, Griffith 323
A-C Supervisory Control System. Marti. 329
Adequate Wiring of Buildings, an Essential for Good Illumination. Stickney, Sturrock. (Abs. 409) 647
Adult Technical Education in Metropolitan Areas. Ehbach 698
Air Transportation, Wire Communication Aids. Nance. (Abs. 408) 492
Alternator, Reestablishing Excitation of a Loaded. Higgins, Wild 119
Aluminum, Oxid Coatings on. Edwards, Tosterud, Work. (Abs. 406) 778
American Engineering Council Progress Report—The Relation of Consumption, Production, Distribution 373
Consumption, Production, Distribution. (Letters)
Forbes 599, 667
Turner 667
Jackson 743
Jones 813
Breckenridge 885
Savings and Investment. (Letter). Button 669
Savings and Investment. (Letter). Forbes 526
(See also Genl. News Index)
Analysis of Equivalent Circuits. Starr. Abs. 43) 555
Application and Performance of Automatic Equipment on the American Gas and Electric System. Sporn, Lanphier, Turner. (Abs.) 412
Application of High Speed Relays. Gerrell. (Abs.) 411
Application of the Cooperative Method of Instruction to Engineering Schools and Polytechnic Institutes. Jackson 19
Arc Discharges, Cathode Drop in. Mackeown 386
Arcovers *versus* Size and Humidity, Insulator. Frey, Hawley. (Abs. 192) 505
Arc Rupturing Devices, Recent Developments in. Van Sickle, Leeds. (Abs.) 40
Arc Welded Steel Frames, Residences With 38
Arc Welding, Metal Deposition in Electric. Doan, Weed 852
Arc Welding, Researches in. Doan, Myer 624
Arcs in Turbulent Gases, Extinction of A-C. Browne. (Abs.) 40
Automatic Combustion Control. Sanderson, Ricketts 102
Automatic Concentration Unit for Printing Telegraph Circuits, An. Vernam. (Abs.) 48
Automatic Oscillograph, An. Hathaway, Buell. (Abs.) 130
Automatic Railway Substations, Mercury Arc Rectifier *versus* Rotary Converter. Ward. (Abs.) 191
Auxiliaries, Electric Drive for Power Plant. Smith 25
Auxiliaries, Importance of Reliable Power Plant. Hollister 20
Auxiliaries, Steam Driven Power Plant. Dryer 21
Auxiliaries, Steam *vs.* Electricity for Driving Power Station 20
Auxiliary Drive for Steam Power Stations. Hollister 20

B

Boric Acid Fuse, The. Strom, Rawlins. (Abs.) 411
Braking of Synchronous Machines, Dynamic. Kilbourne, Terry. (Abs. 409) 843
Brass Tacks in Economics. Coyle 712
Breakdown of Glass With Alternating Potentials, The. Kenney, Luery, Moriaty. (Abs.) 43
Bridge Method of Testing Welds, A. Batcheller 781
Brief Review of Contemporary Dielectric Research, A 30
(Building Design) "Nothing More Modern." Fawcett 621
Buildings for Good Illumination, Wiring. Stickney, Sturrock. (Abs. 409) 647

C

Cable, A New Carrier Telephone. Affel, Gorton, Chesnut. (Abs. 48) 332
Cable for Columbia River Crossing, 115-Kv submarine. Pearson, Shanklin, Bullard, Clark. (Abs. 659) 685
Cable Improvement, Dielectric Research Presages 34
Cable, Tape Armored Telephone Toll. Nystrom 168
Cables, Direct Printing Over Long Non-Loaded. Woodward, Connery. (Abs.) 132
Cables in Large Buildings, Telephone. (Abs. 661) 867
Cables, Locating Faults in Power. Taylor 870
Cables, Present Practice in Insulated Power. Simmons 83
Cables, Pulp Insulation for Telephone. Walker, Ford. (Abs. 660) 838
Cables, Thermal Transients and Oil Demands in. Miller, Wollaston. (Abs. 659) 858
Cables With Grounded Sheaths, High Voltage Bridge for Measurements of. Dawes, Daniel. (Abs.) 40
Calculation of Generator Overvoltage. Butler 163
Calculation of Inductance and Current Distribution in Low Voltage Connections to Electric Furnaces. Levy. (Abs.) 406
Calculation of No-Load Damper-Winding Loss in Synchronous Machines. Pollard. (Abs.) 46
Calculation of Short Circuits on Power Systems. Wagner, Wright. (Abs.) 131
Calculations on Induction Motors, Performance. Veinott. (Abs.) 264
Calorimeter Measurement of Stray-Load Losses of 55,000-Kva Generator Having Enclosed System of Ventilation. Floyd, Dunbar 497
Capacitance Bridge, Power Factor Measurement by the. Siskind. (Abs.) 41
Capacitor Motors for Balanced Operation, Design of. Tricley. (Abs.) 266
Carrier Application to a Telegraph Plant. Smith, Kelley. (Abs. 49) 784
Carrier Telephone Cable, A New. Affel, Gorton, Chestnut. (Abs. 48) 332
Cathode Drop in Arc Discharges. Mackeown 386
Cathode Drop in Arcs and Glow Discharges. Mackeown 386
Centrifugal Air Cleaners Serve Railway Equipment. Baldwin 869
Characteristics of a Mercury Vapor Tube. Seletsky, Shevki 500
Characteristics of Electromagnetic Radiation From Aircraft in Flight. Coe, Rives. (Abs.) 408
Characteristics of Load Ratio Control Circuits. Blume. (Abs.) 408
Characteristics of Surge Generators. Bellaschi. (Abs.) 407
Characteristics of Synchronous Generators, Field Tests to Determine the Damping. Hamilton. (Abs.) 265
Characteristics of Synchronous Machines Following System Disturbances, Torque-Angle. Crary, Waring. (Abs.) 265
Chemical Research in Insulating Materials. Clark 30
Chicago District. Perry, Smith. (Abs.) 405
Circuit Interruption, The Practical Application of the Oil Blast Principle of. Spurck. (Abs.) 39
Circuits, Analysis of Equivalent. Starr. (Abs. 43) 555
Circuits, Direct Solution of Coupled Tuned. Kelley 789
Circuits Involving Synchronous Machines, Vector Theory of. Summers. (Abs.) 132
Circuits of Electrical Networks, Geometrical. Foster. (Abs.) 43
Circuits Subjected to Traveling Waves, The Solution of. Rorden. (Abs.) 267
Circuits, Three Phase Multiple Conductor. Clarke. (Abs.) 267
Cobalt Magnet Steel. Brace. (Abs.) 131
Columbia River Crossing, 115-Kv Submarine Cable for. Pearson, Shanklin, Bullard, Clark. (Abs. 659) 685
Combined Aspects of Reliability and Economy in the Operation of Large Electric Systems. (Symposium) (Abs.). See Reliability 405
